EMPOWER
YOURSELF.

phios
we empower your business

Developing highly sophisticated cloud, web and mobile software solutions as well as embedded systems for our customers is an exciting challenge. Would you like to accept this challenge with us? Are you used to thinking "out of the box" in unconventional ways? Then you are the right person to join our team!

With its headquarters in Ruggell, Liechtenstein, phios has been around since 2007 and has an excellent reputation as reliable software engineering partner who delivers best quality in time. Our team of 25 highly qualified software engineers, architects, product owners and consultants give their best every day for a great customer experience.

SENIOR SOFTWARE ENGINEER (WEB & MOBILE)

📍 Valencia, Spain

THIS APPEALS TO YOU

- Designing and developing web and mobile frontends for sophisticated software systems, mostly from scratch.

- Working agile in scrum teams and being responsible for all UI concerns.

- Supporting our customers and product owners with your expertise in UI design to provide optimal user experience.

- Shaping mockups and wireframes to gain better understanding of customer needs and the business domain.

- Managing working time on your own terms while coordinating with the team and our customers.

- Occasionally travelling to either Ruggell or Valencia to get in touch with your team members and work together in the projects.

THIS IS YOU

- You have a university- or technical college degree in Computer Science or a related discipline.

- Profound experience in software development using web technologies like Angular, Ionic and React.

- You have a flair for UI design and usability and are able to discover and eliminate/avoid UI design smells.

- Passionate about good software- and component design (CI/CD, Refactoring, unit testing and e2e testing).

- Ideally, you are familiar with monorepo and microfrontend approaches.

- Strong communication skills in German and English with the ability to work in intercultural and distributed teams.

YOUR TECHNOLOGY STACK

- Angular (React, Vuejs optional)
- RxJS
- TypeScript
- HTML5 & SASS
- Ionic (Flutter, React Native, Xamarin optional)
- PWA

- Docker
- Gimp, AdobeXD, AI or other tools for creating mockups and wireframes
