

WE EMPOWER YOUR BUSINESS WITH HIGH-END DIGITAL SOLUTIONS

Developing highly sophisticated cloud, web and mobile software solutions as well as embedded systems for our customers is an exciting challenge. Do you like to accept this challenge with us? Are you used to thinking "out of the box" in unconventional ways? Then you are the right person for our team!

With its headquarters in Ruggell, Liechtenstein, PHIOS was founded in 2007 and has an excellent reputation as reliable software engineering partner who delivers best quality in time. Our team of 30 highly qualified software engineers, architects, product owners and consultants give their best every day for a great customer experience.

SENIOR SOFTWARE ENGINEER (Fullstack)

 Vienna, Austria

STEFAN.VOEGEL@PHIOS.AT | +43 664 6210935 | WWW.PHIOS.AT

THIS APPEALS TO YOU

- Designing and developing sophisticated software systems, mostly from scratch.
- Working agile in scrum teams and drive continuous improvement within your projects.
- Supporting our product owners with your technical knowledge to define software requirements.
- Applying technical knowledge while defining the software architecture.
- Managing working time on your own terms while coordinating with the team and our customers.
- Occasionally traveling to Ruggell or Valencia to meet team members and work in distributed project teams.
- Working in motivated and open-minded teams with direct relation to our customers.
- Enthusiastic to be one of the first in our Vienna team growing and shaping it substantially
